SHORTENED STATUTORY PERIOD OF RESPONSE	MAIL DATE	DELIVERY MODE
3 MONTHS	02/28/2007	PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

Office Action Summary	Application No.	Applicant(s)	
	10/067,493	MOK ET AL.	
	Examiner	Art Unit	
	Russell S. Glass	3626	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 01 December 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-10, 12-17, 19-21, 23-34, 37-46, 48-53, 55-57 and 59-70 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-10, 12-17, 19-21, 23-34, 37-46, 48-53, 55-57 and 59-70 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 112 & 35 USC § 101

1. The rejection of Claims 35, 36, 71, and 72 under 35 U.S.C. 112, first paragraph, and 35 U.S.C. 101 are withdrawn based on the cancellation of these claims in applicant's amendment dated 12/1/2006.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. **Claims 1-8, 11-21, 28, 30-34, 37-44, 47-57, 64, 66-70 are rejected under 35 U.S.C. 103(a) as being unpatentable over Goldenberg, (U.S. Pub. 2002/0065682) in view of Causey, III, et al., (U.S. 6,641,533).**

4. As per claims 1 and 37, Goldenberg discloses a health-care system and method comprising:

a processing machine, (Goldenberg, Abstract; Figs. 1, 2; ¶ 19, 20, 40, 41);

Art Unit: 3626

a plurality of biosensors respectively equipped to individuals, (Goldenberg, Abstract; Figs. 1, 2; ¶ 19, 20, 40, 41); each of the biosensors being operable to gather information regarding physiological parameters of the respective individuals, (Goldenberg, Abstract; Figs. 1, 2; ¶ 19, 20, 40, 41); and

relay the information to the processing machine over a network, (Goldenberg, Abstract; Figs. 1, 2, 8; ¶ 19, 20, 40, 41, 57-64); and

data links provided from the processing machine to respective providers of a plurality of different health-care services to allow the transmission of instructions over the network for appropriate action to be taken in response to a determination that an individual is likely to suffer from a medical condition, (Goldenberg, Abstract; Figs. 1, 2, 8; ¶ 33, 35, 62-64).

a database storing medical records of at least some of the individuals, said medical records including details of current medication, previous illnesses and allergies, (Goldenberg, Abstract; Fig. 4, 5; ¶ 16, 29, 33, 40, 49);

Goldenberg fails to disclose a personal data storage unit associated with one of the individuals, wherein; said medical records are stored on the personal data storage unit. However, such a system is well-known as evidenced by Causey, (Causey, fig. 21, col. 9, lines 8-13).

It would have been obvious to one of ordinary skill in the art at the time of the invention to combine Goldenberg and Causey. The motivation would have been to provide an improved PDA device that allows a user to avoid the inconvenience of

Art Unit: 3626

carrying multiple electronic devices to test for the same value or characteristic, (Causey, col. 2, lines 6-16).

5. As per claims 2 and 38, Goldenberg discloses a system and method further comprising a first terminal connected to the processing machine and operable to present information received from one or more of the biosensors to allow the determination of whether the individual associated with the one or more biosensors is likely to suffer from a medical condition, (Goldenberg; Abstract; Figs. 1, 2, 8; ¶ 33, 35, 62-64).

The motivation to combine Goldenberg and Causey is as provided in the rejection of claims 1 and 37 and incorporated herein by reference.

6. As per claims 3, 4, 39 and 40, Goldenberg discloses a system and method wherein at least some of the data links comprise links over the network, wherein the network is the Internet, (Goldenberg, ¶ 29).

The motivation to combine Goldenberg and Causey is as provided in the rejection of claims 1 and 37 and incorporated herein by reference.

7. As per claims 5 and 41, Goldenberg discloses a system and method wherein the network comprises a wireless network, (Goldenberg, ¶ 9, 58).

The motivation to combine Goldenberg and Causey is as provided in the rejection of claims 1 and 37 and incorporated herein by reference.

8. As per claims 6 and 42, Goldenberg discloses a system and method wherein the processing machine is operable to transmit instructions to at least one health-care service in response to the receipt of information indicating that at least one of the physical parameters of an individual with which one of the biosensors is associated is outside predetermined limits, (Goldenberg, Abstract; Figs. 1, 2, 8; ¶¶ 33, 35, 62-64).

The motivation to combine Goldenberg and Causey is as provided in the rejection of claims 1 and 37 and incorporated herein by reference.

9. As per claims 7 and 43, Goldenberg discloses a system and method further comprising a delivery device operable to administer automatically a dose of a substance to an individual, (Goldenberg, Abstract; Figs. 1, 2, 8; ¶¶ 33, 35, 62-64).

The motivation to combine Goldenberg and Causey is as provided in the rejection of claims 1 and 37 and incorporated herein by reference.

10. As per claims 8 and 44, Goldenberg discloses a system and method wherein the delivery device is controllable by the processing machine, (Goldenberg, Abstract; Figs. 1, 2, 8; ¶¶ 29).

The motivation to combine Goldenberg and Causey is as provided in the rejection of claims 1 and 37 and incorporated herein by reference.

Art Unit: 3626

11. As per claims 11 and 47, Goldenberg discloses a system and method further comprising a database storing medical records of at least some of the individuals, (Goldenberg, Fig. 7; ¶ 55, 56).

The motivation to combine Goldenberg and Causey is as provided in the rejection of claims 1 and 37 and incorporated herein by reference.

12. As per claims 12 and 48, Goldenberg discloses a system and method wherein the processing machine is operable to update the database following the receipt of information from one of the biosensors, (Goldenberg, Fig. 7; ¶ 55, 56).

The motivation to combine Goldenberg and Causey is as provided in the rejection of claims 1 and 37 and incorporated herein by reference.

13. As per claims 13 and 49, Goldenberg discloses a system and method wherein the processing machine is operable to present at least some of the records relating to an individual along with data received from a biosensor relating to that individual, (Goldenberg, Fig. 7; ¶ 55, 56).

The motivation to combine Goldenberg and Causey is as provided in the rejection of claims 1 and 37 and incorporated herein by reference.

14. As per claims 14 and 50, Goldenberg discloses a system and method wherein the processing machine is operable to allow real-time consultation over the network between one of the individuals and a health-care expert, (Goldenberg. ¶ 10).

Art Unit: 3626

The motivation to combine Goldenberg and Causey is as provided in the rejection of claims 1 and 37 and incorporated herein by reference.

15. As per claims 15 and 51, Goldenberg discloses a system and method wherein the processing machine is operable to allow at least one further party to join the real-time consultation, (Goldenberg, ¶ 10).

The motivation to combine Goldenberg and Causey is as provided in the rejection of claims 1 and 37 and incorporated herein by reference.

16. As per claims 16 and 52, Goldenberg discloses a system and method wherein the real-time consultation comprises video conferencing, (Goldenberg, ¶ 9, 10, 61).

The motivation to combine Goldenberg and Causey is as provided in the rejection of claims 1 and 37 and incorporated herein by reference.

17. As per claims 17 and 53, Goldenberg discloses a system and method wherein the individuals are selected from the group comprising: health-care users, outpatients, in-patients and intensive care patients, (Goldenberg, Abstract).

The motivation to combine Goldenberg and Causey is as provided in the rejection of claims 1 and 37 and incorporated herein by reference.

18. As per claims 18, 19, 54 and 55, Goldenberg discloses a system and method further comprising a personal data storage unit associated with one of the individuals

Art Unit: 3626

operable to receive and store data from a biosensor, (Goldenberg, ¶¶ 63, 64) (disclosing treatment device for receiving, analyzing and sending medical treatment information that is considered to include a storage device or medium).

The motivation to combine Goldenberg and Causey is as provided in the rejection of claims 1 and 37 and incorporated herein by reference.

19. As per claims 20 and 56, Goldenberg discloses a system and method wherein the personal data unit is used to identify an individual to a biosensor before the biosensor gathers the information from the individual, (Goldenberg, Fig. 1; ¶¶ 40, 42).

The motivation to combine Goldenberg and Causey is as provided in the rejection of claims 1 and 37 and incorporated herein by reference.

20. As per claims 21 and 57, Goldenberg discloses a system and method wherein the plurality of biosensors are operable to gather information on selected physiological parameters in dependence upon the identity of an individual, (Goldenberg, Fig. 1; ¶¶ 27, 40, 42).

The motivation to combine Goldenberg and Causey is as provided in the rejection of claims 1 and 37 and incorporated herein by reference.

21. As per claims 28 and 64, Goldenberg discloses a system and method wherein the portable processing device is operable to analyze data received from the personal data storage unit to determine whether at least one of the physical parameters of an

Art Unit: 3626

individual with which one of the biosensors is associated is outside predetermined limits, (Goldenberg, ¶¶ 55, 63, 64) (disclosing treatment device for receiving, analyzing and sending medical treatment information that is considered to include a storage device or medium).

The motivation to combine Goldenberg and Causey is as provided in the rejection of claims 1 and 37 and incorporated herein by reference.

22. As per claims 30 and 66, Goldenberg discloses a system and method wherein the health-care services are selected from the group comprising: a pharmacy, a physician, an emergency service; a medical hardware supplier; a nutritionist; a source of health-care information; a health-care related government body; a nursing care centre; a research facility; a health insurance broker; and a financial institution, (Goldenberg, Abstract, ¶¶ 54-56)(disclosing a physician).

The motivation to combine Goldenberg and Causey is as provided in the rejection of claims 1 and 37 and incorporated herein by reference.

23. As per claims 31 and 67, Goldenberg discloses a system and method wherein one of the health-care services comprise a source of medical records having features selected from the group comprising bio-data, health-care records, a health-care calendar, and a financial calendar, (Goldenberg, Abstract, ¶¶ 59)(disclosing bio-data such as vital signs).

Art Unit: 3626

The motivation to combine Goldenberg and Causey is as provided in the rejection of claims 1 and 37 and incorporated herein by reference.

24. As per claims 32 and 68, Goldenberg discloses a system and method wherein the processing machine is operable to transmit information regarding a condition that an individual has or is likely to develop to the individual, (Goldenberg, Abstract; Figs. 1, 2, 8; ¶ 33, 35, 62-64).

The motivation to combine Goldenberg and Causey is as provided in the rejection of claims 1 and 37 and incorporated herein by reference.

25. As per claims 33 and 69, Goldenberg discloses a system and method wherein the information is relayed to the processing machine over the network in an encrypted form, the encryption being specific to the individual to whom the information relates, (Goldenberg, Fig. 1; ¶ 40).

The motivation to combine Goldenberg and Causey is as provided in the rejection of claims 1 and 37 and incorporated herein by reference.

26. As per claims 34 and 70, Goldenberg discloses a system and method wherein an individual has an identification number and the gathered information for the individual is encrypted with the identification number into a data packet for decryption by the processing machine, (Goldenberg, Fig. 1; ¶ 40, 42).

Art Unit: 3626

The motivation to combine Goldenberg and Causey is as provided in the rejection of claims 1 and 37 and incorporated herein by reference.

27. Claims 9, 10, 22, 23, 25, 27, 45, 46, 58, 59, 61, 63 are rejected under 35 U.S.C. 103(a) as being unpatentable over Goldenberg in view of Causey, and further in view of Nelson et al., (U.S. 6,418,346).

28. As per claims 9 and 45, Goldenberg and Causey fails to disclose a system and method further comprising a location tracking device associated with one of the individuals, to track the location of the individual. However, such claimed systems and methods are well-known in the art as evidenced by Nelson, (Nelson, col. 4, line 50-col. 5, line 19).

The motivation to combine Goldenberg and Causey is as provided in the rejection of claims 1 and 37 and incorporated herein by reference.

It would have been obvious to one of ordinary skill in the art at the time of the invention to combine Goldenberg and Causey with Nelson. The motivation would have been to enhance remote monitoring of medical devices on a chronic basis to deliver clinical therapy in real-time, (Nelson, Abstract).

29. As per claims 10 and 46, Goldenberg and Causey fails to disclose a system and method wherein instructions transmitted over the network to a health-care service

Art Unit: 3626

include the location of an individual. However, such claimed systems and methods are well-known in the art as evidenced by Nelson, (Nelson, col. 4, line 50-col. 5, line 19).

The motivation to combine Goldenberg and Causey is as provided in the rejection of claims 1 and 37 and incorporated herein by reference.

The statement of obviousness and motivation to combine Goldenberg and Causey with Nelson is as provided in the rejection of claims 9 and 45 and is incorporated herein by reference.

30. As per claims 22 and 58, Goldenberg and Causey fails to disclose a system and method wherein records relating to the individual are stored on the personal data storage unit. However, such claimed systems and methods are well-known in the art as evidenced by Nelson, (Nelson, Abstract; Fig. 5; col. 7, line 15-col. 8, line 47).

The motivation to combine Goldenberg and Causey is as provided in the rejection of claims 1 and 37 and incorporated herein by reference.

The statement of obviousness and motivation to combine Goldenberg and Causey with Nelson is as provided in the rejection of claims 9 and 45 and is incorporated herein by reference.

31. As per claims 23 and 59, Goldenberg and Causey fails to disclose a system and method wherein the personal data storage unit allows access to a database on which medical records relating to the individual are stored. However, such claimed systems

Art Unit: 3626

and methods are well-known in the art as evidenced by Nelson, (Nelson, Abstract; Fig. 5; col. 7, line 15-col. 8, line 47).

The motivation to combine Goldenberg and Causey is as provided in the rejection of claims 1 and 37 and incorporated herein by reference.

The statement of obviousness and motivation to combine Goldenberg and Causey with Nelson is as provided in the rejection of claims 9 and 45 and is incorporated herein by reference.

32. As per claims 27 and 63, Goldenberg and Causey fails to disclose a system and method further comprising a portable processing device, wherein the personal data storage unit is operable to transfer data stored therein to the portable processing device. However, such claimed systems and methods are well-known in the art as evidenced by Nelson, (Nelson, Fig. 4, col. 7, line 45-67; col. 13, lines 11-38).

The motivation to combine Goldenberg and Causey is as provided in the rejection of claims 1 and 37 and incorporated herein by reference.

The statement of obviousness and motivation to combine Goldenberg and Causey with Nelson is as provided in the rejection of claims 9 and 45 and is incorporated herein by reference.

33. As per claims 25 and 61, Goldenberg and Causey fails to disclose a system and method wherein the personal data storage unit is operable to connect to the network by a wireless connection or by a contact connection. However, such claimed systems and

Art Unit: 3626

methods are well-known in the art as evidenced by Nelson, (Nelson, Fig. 4, col. 7, line 45-67; col. 13, lines 11-38).

The motivation to combine Goldenberg and Causey is as provided in the rejection of claims 1 and 37 and incorporated herein by reference.

The statement of obviousness and motivation to combine Goldenberg and Causey with Nelson is as provided in the rejection of claims 9 and 45 and is incorporated herein by reference.

34. Claims 24, 26, 29, 60, 62, 65 are rejected under 35 U.S.C. 103(a) as being unpatentable over Goldenberg, in view of Causey, and further in view of Snowden et al., (U.S. Pub. 2002/00226332).

35. As per claims 24 and 60, Goldenberg and Causey fails to disclose a system and method wherein the personal data storage unit is programmed to allow access to selected portions of medical records of the individual to selected entities. However, such claimed systems and methods are well-known in the art as evidenced by Snowden, (Snowden, Abstract; ¶ 77-79) (disclosing patient-controlled access to selected portions of medical records medical records).

The motivation to combine Goldenberg and Causey is as provided in the rejection of claims 1 and 37 and incorporated herein by reference.

It would have been obvious to one of ordinary skill in the art at the time of the invention to combine Goldenberg and Causey with Snowden. The motivation would

Art Unit: 3626

have been to create a secure repository for personal medical records accessible in selected parts over secure lines, (Snowden, Abstract).

36. As per claims 26 and 62, Goldenberg and Causey fails to disclose a system and method wherein the personal data storage unit comprises a smart card. However, such claimed systems and methods are well-known in the art as evidenced by Snowden, (Snowden, Abstract, ¶ 105).

The motivation to combine Goldenberg and Causey is as provided in the rejection of claims 1 and 37 and incorporated herein by reference.

The statement of obviousness and motivation to combine Goldenberg and Causey with Snowden is as provided in the rejection of claims 24 and 60 and is incorporated herein by reference.

37. As per claims 29 and 65, Goldenberg and Causey fails to disclose a system and method wherein, the access of the selected entities to the selected portions of the records expires after a predetermined period. However, such claimed systems and methods are well-known in the art as evidenced by Snowden, (Snowden, 105-109) (disclosing emergency access of patient records by emergency health personnel wherein it would be obvious that the permission for access would expire after the emergency was over).

The motivation to combine Goldenberg and Causey is as provided in the rejection of claims 1 and 37 and incorporated herein by reference.

Art Unit: 3626

The statement of obviousness and motivation to combine Goldenberg and Causey with Snowden is as provided in the rejection of claims 24 and 60 and is incorporated herein by reference.

Response to Arguments

Applicant's arguments with respect to claims 1-10, 12-17, 19-21, 23-34, 37-46, 48-53, 55-57, 59-70 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
